

Mumps Update

November 16, 2015

All data presented in this report are provisional and may change as additional reports are received

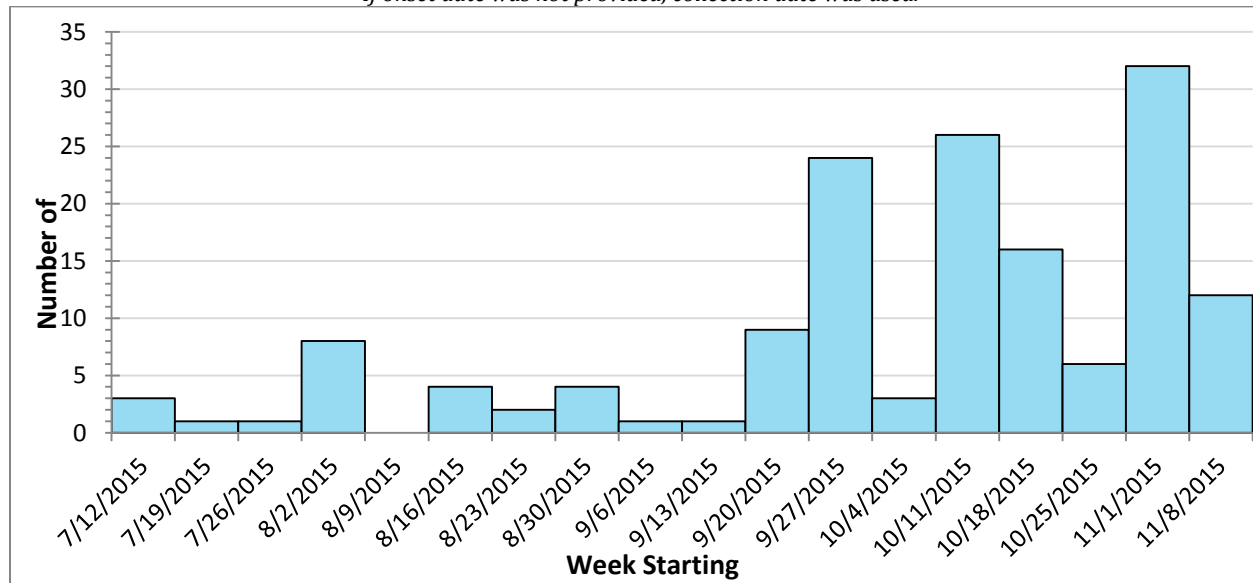

Number of Laboratory Confirmed Mumps Cases in Iowa, July 12 – November 14, 2015

	Johnson County	Outside of Johnson County	Total
Lab confirmed	129	24	153

Laboratory confirmed cases include only those cases with positive tests by PCR and/or serology. Clinically diagnosed cases are not included. Also, many persons with mumps will have no or mild symptoms and never seek medical care. Thus, the true number of mumps cases is many times the number above.

Laboratory confirmed mumps cases by week of symptom onset*, July 12 - November 14, 2015

*If onset date was not provided, collection date was used.

Laboratory confirmed mumps cases by county of residence, July 12 - November 14, 2015

Student cases reported to IDPH may use either their parents address or their student address. After public health investigation, cases occurring during the school year are recorded as occurring at the student address.
